DUCAT HALL

01

[Section title]

[One sentence introducing this section]

[Topic title]

[Main point]

[Explain the point in a short paragraph. State what matters to this audience and why.]

[Add the evidence or context needed to understand the point. Use this space for prose, not a long list.]

[Comparison topic]

[First perspective]

[Describe this perspective, option or workstream. Keep the content focused on the same criteria used in the other column.]

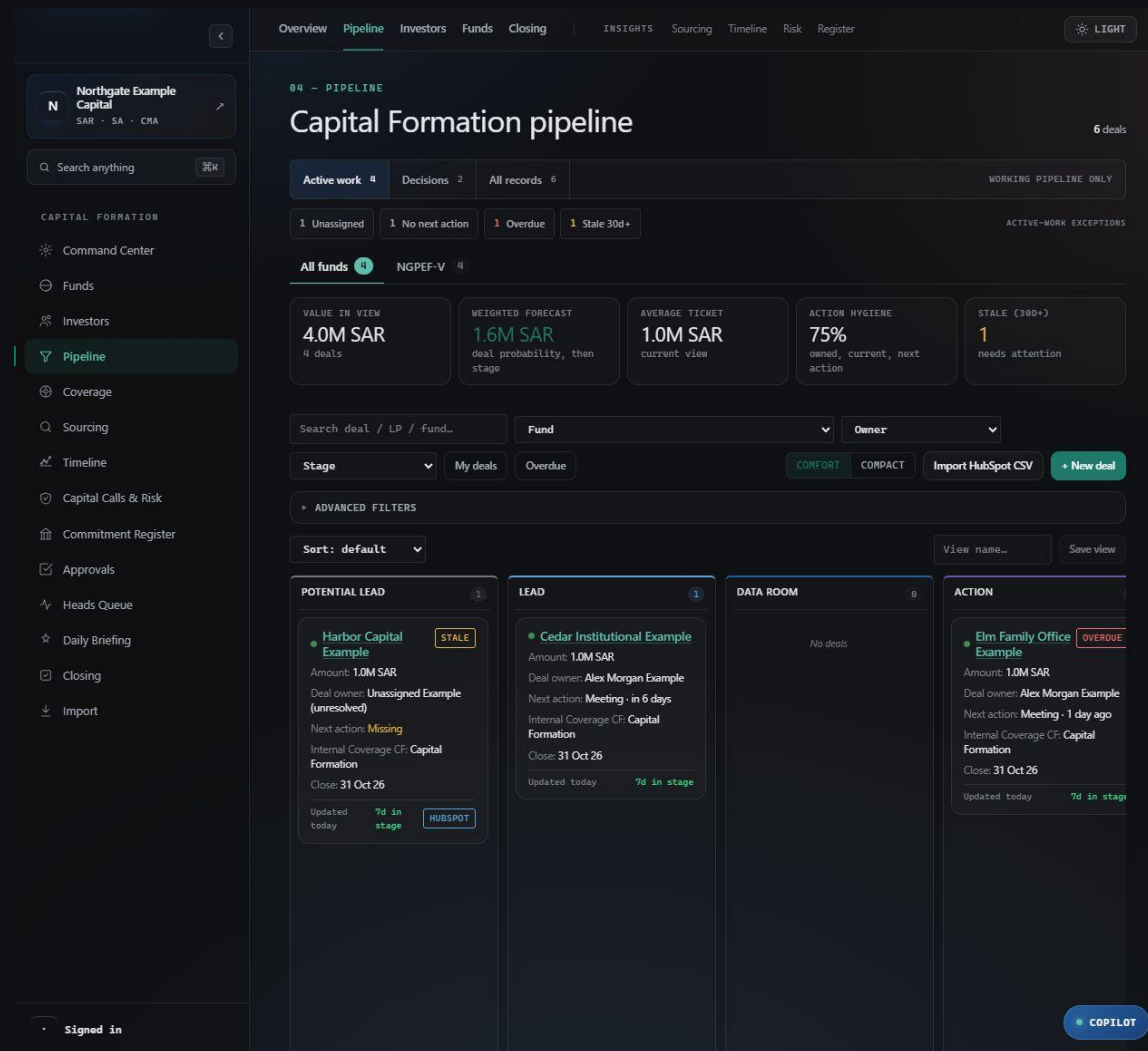

[Second perspective]

[Describe the second perspective with comparable detail. Replace both columns with the information the audience needs.]

Capital pipeline

[Explain the workflow shown on screen]

[Add the relevant product context for this audience.]

The screenshot displays a software interface for managing a capital pipeline. The top navigation bar includes tabs for Overview, Pipeline (selected), Investors, Funds, Closing, and a settings icon. Below this, a sub-header shows '04 - PIPELINE' and 'Capital Formation pipeline' with '6 deals'. The interface is divided into a left sidebar and a main content area. The sidebar lists various functions: Command Center, Funds, Investors, Pipeline (highlighted), Coverage, Sourcing, Timeline, Capital Calls & Risk, Commitment Register, Approvals, Heads Queue, Daily Briefing, Closing, and Import. The main content area features a top section with filters for 'Active work' (4), 'Decisions' (2), and 'All records' (6). Below this, a summary row shows '1 Unassigned', '1 No next action', '1 Overdue', and '1 Stale 30d+'. A 'All funds' section displays four key metrics: 'VALUE IN VIEW' (4.0M SAR, 4 deals), 'WEIGHTED FORECAST' (1.6M SAR, deal probability, then stage), 'AVERAGE TICKET' (1.0M SAR, current view), 'ACTION HYGIENE' (75%, owned, current, next action), and 'STALE (30d+)' (1, needs attention). The main view is a Kanban-style board with columns: 'POTENTIAL LEAD' (1 deal, 'Harbor Capital Example', 1.0M SAR, Unassigned Example, Missing next action, Internal Coverage CF: Capital Formation, Close: 31 Oct 26, Updated today, 7d in stage, HUBSPOT), 'LEAD' (1 deal, 'Cedar Institutional Example', 1.0M SAR, Deal owner: Alex Morgan Example, Next action: Meeting - in 6 days, Internal Coverage CF: Capital Formation, Close: 31 Oct 26, Updated today, 7d in stage), 'DATA ROOM' (0 deals, 'No deals'), and 'ACTION' (1 deal, 'Elm Family Office Example', 1.0M SAR, Deal owner: Alex Morgan Example, Next action: Meeting - 1 day ago, Internal Coverage CF: Capital Formation, Close: 31 Oct 26, Updated today, 7d in stage, OVERDUE). The bottom of the interface shows a 'Signed in' status and a 'COPILLOT' button.

Actual interface. Fictional demonstration data.

[Metrics topic]
